

# Icinga Documentation

Learn how to kickstart your Icinga installation and how to monitor your IT infrastructure.

## Icinga 2

The heart of our monitoring platform with a powerful configuration language and REST API.

[Read the Docs](#)

## Icinga Web 2

A lightweight and extensible web interface to keep an eye on your environment. Analyse problems and act on them.

## Icinga DB

A lightweight and extensible web interface to keep an eye on your environment. Analyse problems and act on them.

[Read the Docs](#)

## Director

Configure Icinga within the web interface, import data from your existing databases and automate tasks.

[Read the Docs](#)

## Icinga for vSphere®

Get an overview over your whole VMware infrastructure. The module connects directly to vCenter to collect data.

[Read the Docs](#)

## Icinga for Windows

Entirely manage an Icinga 2 Agent setup and provide check plugins to fetch information from Windows hosts.

[Read the Docs](#)

## Icinga Reporting

Icinga Reporting is the central component for reporting related functionality in the Icinga web frontend.

[Read the Docs](#)

## Business Process

Create top-level views of your applications in a graphical editor. Rules express dependencies between existing hosts and services and let you alert on application level.

[Read the Docs](#)

## Icinga Certificate Monitoring

Icinga Certificate Monitoring keeps track of certificates as they are deployed in a network environment.

[Read the Docs](#)

## JIRA Module

The JIRA module connects Icinga in both directions with JIRA to create and review issues.

[Read the Docs](#)

## Icingabeat

Icingabeat is an Elastic Beat that fetches data from the Icinga 2 API and sends it to Elasticsearch or Logstash.

[Read the Docs](#)

## Graphite Module

The Graphite module for displays data stored in Graphite directly in the Icinga Web 2 interface.

[Read the Docs](#)

# Elasticsearch Module

The Elasticsearch module for Icinga Web 2 embeds data from Elasticsearch directly into the web interface.
