

Seoul 2018 E-Leaders

Digital Transformation: exploring how emerging technologies meet the needs of a user-driven public sector

- SESSION 3

Jose Clastornik, Chief Executive

ET in citizen-driven public sector

e.g. AI: Navigating through the hype

- Establishing a strategic, sustainable, ethical, transparent and outcomes-driven roadmap
- Balancing the potential for gains in effectiveness with the risk of misuse
- Accelerating the development of multi-disciplinary capabilities
- and of course, getting the data in shape

Uruguay - AI first steps

- Established an internal AI Task Force - A multidisciplinary team to build awareness and craft a strategy to create a common framework for govt implementation
- Augmenting internal capabilities with external AI expertise (e.g. knowledge sharing with Canada and Italy)
- Exploring a range of AI-enabled solutions and use cases, engaging the ecosystem
