About BIND

Connecting Tech Startups with Industry-Leading Clients

The BIND Open Innovation Platform is a public-private initiative funded by the Basque Government and the Department of Industry, Energy Transition and Sustainability through the SPRI Group. Launched in 2016, we facilitate transformative pilot projects with unparalleled business support, leveraging the region's strategic commitment to Industry and Innovation.

BIND connects innovative startups worldwide with industry-leading companies to implement mutually beneficial collaborations. With 10 successful editions and over 400 disruptive projects developed, we are Europe's largest Open Innovation catalyst, having impacted almost 300 tech startups and scaleups so far.

Our platform offers impactful startup programmes matching innovative technologies with venture clients to develop groundbreaking digital transformation projects. We boost innovation for local organisations while strengthening the entrepreneurial ecosystem by attracting startups with solutions applicable across sectors.

BIND accelerates startup growth through support services, business opportunities, and client connections for real, paid projects. Currently, 100 corporate companies, government organisations, and SMEs participate in our platform ready to implement collaborative projects.

We use the Venture Client approach: participating startups secure at least one paid pilot project with respected companies while retaining full ownership without equity exchange. This win-win model helps startups grow through paid projects with reference customers while well-established companies discover, test and implement new technologies to enhance digital transformation.

The symbiosis is clear: corporate resources and processes combined with startup agility and speed. We're proud of the impact made and success in facilitating collaborative and influential Open Innovation projects.

Your Gateway to Venture Clients

BIND Open Innovation

BIND connects dynamic startups with 100 well-respected corporations and SMEs based in the Basque Country, seeking external solutions for digital transformation. Venture Clients invest by contracting startups for real use case projects while acting as reference clients, helping startups

gain product validation and marketplace traction. This annual programme provides expert mentoring, immersion in the Basque entrepreneurial ecosystem, with investors, technology partner services and unparalleled business support.

BIND GovTech

Focused on public sector innovation, BIND GovTech connects startups with Basque Government Organisations seeking groundbreaking technologies. Government members identify technological challenges and seek solutions enhancing accessibility,

efficiency, and sustainability of public services. This tailored programme offers startups public sector projects plus specialized training to ensure successful collaboration with government agencies.

All BIND programmes are free to participate with no application fees. Startups retain full intellectual property and no equity is taken.

Innovation Focus Areas

Our industrial corporate, SME, and government partners actively seek a wide range of solutions in: additive manufacturing, advanced materials, AI, AR/VR, big data analytics, bio-based solutions, blockchain, circular economy, cleantech, collaborative robotics, computer vision, cybersecurity, digital twin, drones, e-mobility, indoor positioning, IoT/IIoT, machine learning, medical devices, nanotechnology, quantum computing, robotics and electronics, smart energy & storage, and wearables.

Global startups with near-market or market-ready solutions are invited to apply.

Join Basque Country's Thriving Innovation Ecosystem

Immersion in the Basque Entrepreneurial Hub	✓	✓
Executive Training	✓	✓
High Impact Mentoring	✓	
Service from Technological Partners	✓	
Access BIND Venture Club Investors	✓	

Venture Client Model & Startup Benefits

Through the Venture Client approach, participating startups secure at least **one paid pilot project** with respected companies plus comprehensive support services. Our Global Startup Network solves real challenges for over 100 Corporate Partners, SMEs, and Government Organisations, making BIND a catalyst for open innovation and mutually beneficial opportunities.

Venture Clients invest by purchasing products or solutions for pilot projects while acting as reference clients and, in some cases, providing proof of concept. **Our zero-equity platform** is unique: startups retain intellectual property, no equity is exchanged, and participation is free.

Beyond paid contracts to test and implement solutions, the BIND Platform provides **exceptional immersion support** including executive training, dedicated workspaces, 1:1 business mentoring, technology partner resources, networking, industry events, Demo Day, plus investor access through the BIND Venture Club.

Executive education and expert mentoring help founders **establish long-term success strategies**. Extensive networking activities with participating companies and the public facilitate startup immersion into the Basque industrial ecosystem, one of Europe's most vibrant and growing innovation hubs.

Corporate Services

Corporate clients access an agile Open Innovation Platform to **discover, meet, and contract** leading startups and technologies through the Venture Client approach. BIND introduces businesses to innovative solutions for their digitisation challenges, enabling early adoption of cutting-edge technologies and rapid integration of competitive solutions.

Key benefits include targeted startup scouting, customized training, and identification of the latest technologies aligned with partner priorities. BIND helps organisations define annual innovation challenges or use cases so they can pursue individual projects or identify group challenges benefiting entire industries.

BIND offers training and workshops **bridging the startup-corporate gap**, establishing collaborative frameworks for successful projects and relationships.

The platform serves as a forum for Open Innovation and Venture Clienting, enabling learning from innovative leaders within the local industrial ecosystem. Through networking, executive education, and industry events, organisations share venture client experiences and gather insights for their innovation strategies.

Ultimately, BIND **attracts global talent and empowers established companies** to innovate through startup collaboration, enhancing the competitiveness of Basque Country businesses.

BIND IMPACT FIGURES

Benefits from the BIND Platform extend long after participation through the experience, knowledge and business connections acquired during our programmes. BIND does more than facilitate a paid project with a reference client — it opens doors to new opportunities. A striking 78% of participating startups go on to secure a second contract with another company in the BIND ecosystem, demonstrating that participation offers access to a broader network of programmes and potential clients.

Our executive education sessions help Founders establish strategies and procedures, providing transferable skills for future B2B relationships. Overall, startups double their income within one year of their graduation from the programme, and collaborative projects developed have generated over €10M in sales turnover.

These impact figures stem from market-validation with reference clients and immersive networking events. BIND Startups regularly network with key players in the Basque ecosystem, participate in industry events, and access public and private funding opportunities.

BIND has been internationally recognized for successfully supporting young companies entering the Basque Industrial and Entrepreneurial Hub. The BIND Corporate programme was acknowledged by international consulting firm Gartner as one of the best innovation platforms and received a 2022 European Commission Award for Improving the Business Environment.

In 2025, BIND was recognized as the Best Acceleration Initiative of the Year at the Disruptores Innovation Awards, organised by the leading innovation and entrepreneurship magazine in Spain, El Español. In 2024, the BIND Platform was ranked in the top 25 of 125 Leading European Startup Hubs by the Financial Times. In 2023, BIND received the Startup Ecosystem Stars Award as an outstanding model of how government agencies can catalyze regional innovation.

By supporting businesses and boosting the local ecosystem through collaborative digital transformation projects, together, we're driving innovation forward.

THE THRIVING BASQUE ECOSYSTEM

There are countless reasons to choose the BIND Platform, part of a larger public initiative promoting, attracting and investing in innovation and emerging technologies. The Basque Country, one of the highest projected regions in Europe with over a century of Industrial activity, is home to some of the world's most influential manufacturing companies. 100 international companies have partnered with BIND and we are proud of the value we have generated in attracting top talent and driving innovation.

The Basque Industry Plan – Euskadi 2030 aims to achieve 25% industrial GDP by 2030 through digitisation, decarbonization, and high-quality job creation while supporting SME growth with over €100 million in investment. The BIND Platform directly supports this plan's goal of developing "more industry, better industry and fewer emissions" serving as the region's open innovation hub, connecting startups with industrial leaders to advance digital transformation through public-private collaboration.

The Basque Country currently has more than 1,000 technology startups that have an estimated valuation of more than 1.5 billion euros. It's an ecosystem with differential public support, where more than 100 public and private agents work to establish the best environment for the birth, development and growth of innovative and/or technology-based companies. In 2024, the entire Basque ecosystem made available 800 initiatives to support entrepreneurship, which represents a total budget of more than 82M€. The BIND Platform is one of the many successful programmes designed to support and expand the Basque Advanced Industrial and Entrepreneurial networks.

Now in its 10th edition, BIND has a proven venture-client model and strategic open innovation approach that aligns with the needs of both emerging companies and established industry leaders. With oversight by government agencies, BIND's public-private structure ensures delivery on set goals, all part of an ecosystem committed to R&D and innovation.

WHO IS BEHIND BIND

Basque Government and the SPRI Group

BIND is the Open Innovation Platform backed by the Basque Government and SPRI Group, a business development agency that equips local companies with resources to secure financing, access industrial sites, adopt new technologies, and expand internationally.

SPRI also leads the “Invest in the Basque Country” initiative, attracting foreign investment and positioning the region as a prime industrial and entrepreneurial destination. The platform operates through free workspaces at the Basque Innovation Centres of Araba, Bizkaia and Gipuzkoa with additional support from Hazi and the Provincial Council of Gipuzkoa.

Thanks To Our Partners

Innovation-driven companies and public organisations have partnered with the BIND Platform to identify and contract cutting-edge tech startups.

From Corporate Venture Clients to SMEs and public organisations, these partners are shaping the future of the Basque Advanced Industrial Ecosystem.

Venture Clients

Cluster Organizations & Collaborators

Govtech Public Organizations

Technological Partners

Our Technological Partners; Microsoft, Amazon Web Services and Oracle, have been instrumental in supporting startup participants. Each partner provides services and technology solutions valued

at €20,000 and enhanced industry visibility. Their contributions support the success of projects developed through BIND.

Venture Club

Leading venture capital and investment firms across Europe have partnered with the BIND Platform to discover and support disruptive tech startups. These firms share BIND's focus on the same markets and industries, bringing deep sector expertise and capital to drive innovation forward.

Together with the venture clients, business mentors and tech partners, venture club members are essential contributors to the BIND Open Innovation Ecosystem.

+275

PARTICIPATING STARTUPS

BIND Startup Alumni

With 10 years catalysing open innovation, BIND has supported over **275 startups and scaleups** at different stages of their journey, whether launching to market, scaling operations, validating solutions, refining sales and pricing strategies or achieving growth milestones. These companies have been contracted by and collaborated with leading companies, executing more than **400 transformative projects** that push innovation forward in real market environments. With validated solutions tested in demanding industrial settings, these young companies are setting new trends in technology and redefining what's possible. Discover the startups shaping the future of innovation.
