For the LAC NCP Network, it has been a real pleasure to share this year with all of you. We are pleased to present Newsletter No. 33, the last of the year 2024.

We would like to take this opportunity to recognize and appreciate the work of the National Contact Points of Latin America and the Caribbean, who play a fundamental role in strengthening the institutional capacities of the Ministries, Councils and Agencies responsible for the public policies of Science, Technology and Innovation in the region.

We also extend our gratitude to the researchers and scientists who, with their dedication and creativity, work to improve the living conditions of the populations of Latin America and the Caribbean.

This year, in collaboration with scientific institutions, universities, research centers and European Union delegations in the region, 15 capacity-building workshops were organized within the framework of the Horizon Europe program. These activities were attended by 1,400 researchers and representatives of the academic and private sectors from the 30 countries of Latin America and the Caribbean.

It is an honor, on behalf of the entire team, to send you our best wishes. We look forward to meeting in 2025, with renewed energy and commitment, to continue developing actions that facilitate the active participation of the region in the Horizon Europe program:

- Claudia Romano Núñez - Coordinator RED LAC NCP Linkedin

CILAC 2024 Forum: A Key Space for Promoting Science, Innovation and Sustainable Development in the Region

December 2-4, Colombia

The CILAC 2024 Forum, fundamental for the promotion of science, technology and innovation in the region, successfully concluded in San Andres Island, Colombia, with more than 3,350 on-site and remote participants. This event had more than 70 sessions, which aimed to generate instances of debate and exchange, seeking to generate agreements and promoting science diplomacy in Latin America and the Caribbean.

Organized by the United Nations Educational, Scientific and Cultural Organization (UNESCO) with the collaboration of the Ministry of Science, Technology and Innovation of Colombia (Minciencias), the forum addressed strategic themes such as artificial intelligence for sustainability, open science, biodiversity, space economy and the Decade of Ocean Sciences. The main idea revolved around the premise: "Science that dialogues", reaffirming that science is a bridge for peace and development.

Although the Forum has ended, CILAC will continue to share news about new activities, initiatives and publications aimed at promoting scientific dialogue and contributing to the design of science and technology policies that favor sustainable development in the region.

ICRI 2024: A Global Meeting to Address Research Infrastructure Challenges

December 3-5, Australia

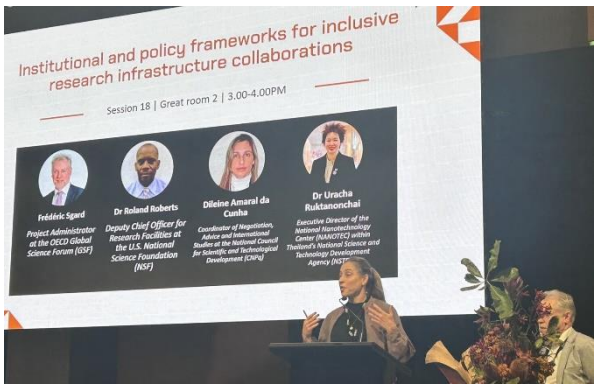

The event brought together policy makers, leaders of research institutions, facility operators, users and researchers to discuss issues of interest, trends and challenges facing RIs around the world.

Around 420 people from 50 countries traveled to Brisbane while more than 500 people from 39 countries joined online. Among the participants, this event was attended by 2 delegates from the WG EU-CELAC RI.

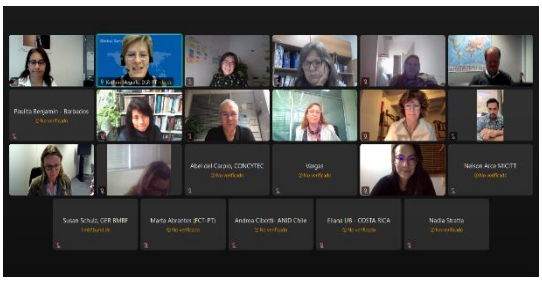

Inmaculada Figueroa, Vice Director General for International Consortia, Organisations & Research Infrastructures, and Coordinator of the EU-LAC ResInfra Project at the Ministry of Science, Innovation and Universities of Spain, presented the European Open Science Cloud (EOSC). This system contributes to improve data interoperability and promotes open science, an area in which ESFRI Research Infrastructures play a key role.

Dileine Cunha, PhD from the National Council for Scientific and Technological Development (CNPq) of Brazil, presented on WG EU-CELAC RI from the LAC perspective, addressing the joint ambition between regions to establish a Latin American and Caribbean Forum on Research Infrastructures (LACFRI) with the advice of ESFRI - European Strategy Forum on Research Infrastructures; in addition to the EU-LAC ResInfra Plus project.

Progress in the EU-CELAC RI Working Group on Energy Transition

November 27 and 28, online

On November 27-28, the 14th meeting of the EU-CELAC Working Group on Research Infrastructures was held online.

The objective of the meeting was to strengthen cooperation between the European Union (EU) and the Community of Latin American and Caribbean States (CELAC) in the field of Research Infrastructures, with a focus on energy transition.

Work was carried out on synergies and opportunities for joint projects, exploring how research infrastructures can contribute to the transition towards renewable energies, sustainable energy systems and technological innovation in the energy sector.

Examples of bi-regional cooperation were also presented and strategic priorities were established to advance future joint research initiatives between the two regions, one example being the development of the Latin American and Caribbean Forum on Research Infrastructures (LACFRI) based on the ESFRI - European Strategy Forum on Research Infrastructures.

CELAC delegates reinforce path towards LACFRI, deepening RI cooperation

November 19, online

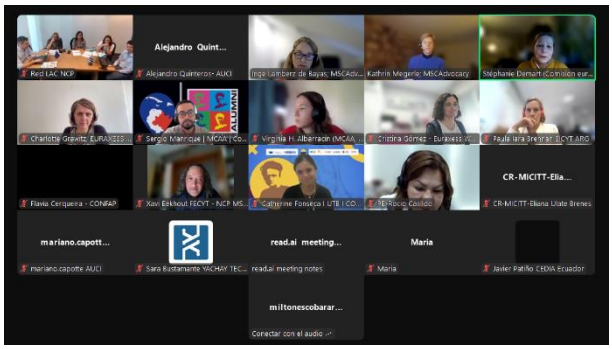

The 14th Meeting of the Intra-CELAC Working Group on Research Infrastructures was held online with the participation of delegates from 14 countries of the Latin American and Caribbean region. The purpose of the meeting was to exchange ideas on the Latin American and Caribbean Forum on Research Infrastructures (LACFRI), as well as to work on the steps to be taken to deepen international cooperation.

During the meeting, the following topics were discussed: the summary of the discussions and webinars within the framework of the EU LAC ResInfra Plus project; the results of the First Meeting of the LACFRI Advisory Board; the experiences of Staff Exchanges; the participation of LAC in ICRI 2024; and the content and organization of the next EU-CELAC meeting.

MSCA Event: “Towards the consolidation of MSCA's participation in LAC”.

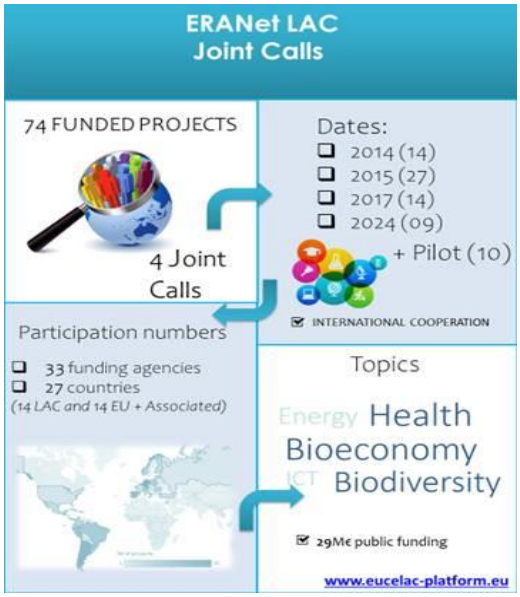

December 11, hibrido

Representatives of: the LAC NCP Network; Marie Curie Alumni Association (MCAA); European Commission DG EAC; EURAXESS Worldwide; the MSCA NCPs of LAC; University Networks such as: ASCUN and CEDIA, met at the hybrid event “Towards the consolidation of MSCA participation in LAC”. The purpose of this event was to exchange experiences in order to optimize and enhance synergies between the different actors working in the region with the aim of expanding the participation of these countries in MSCA.

5th Meeting of the EU-LAC Interest Group takes place

December 11, online

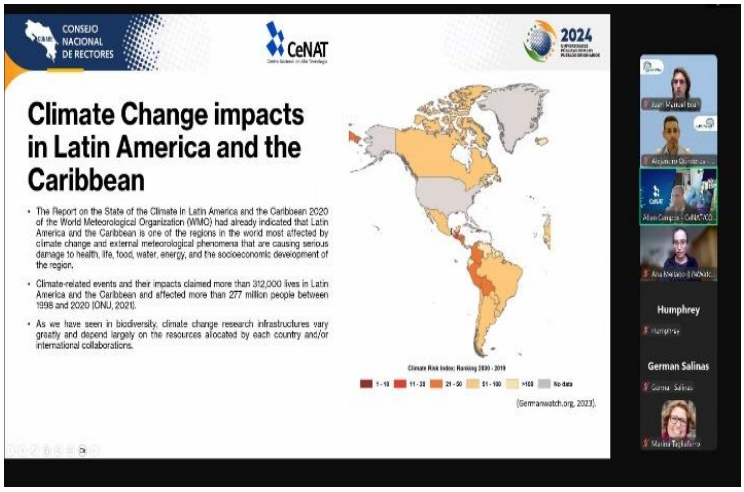

The EU-LAC Interest Group organizes joint activities inviting all funding agencies from both regions that wish to collaborate in science, technology and innovation. In this context, the 5th Meeting of the EU-LAC Interest Group was held to discuss the results and impact of the Joint Calls, as well as to present the new call, which will remain open from February 3, 2025 to April 30, 2025. The topics to be covered by the new call were also discussed: Biodiversity (including agriculture and food security); Bioeconomy and nature-based solutions; Health; Energy; and Open Science. Finally, the B2B Matchmaking Platform was presented, which provides the possibility to find new project partners for the 5th EU-LAC Joint Call according to their topic. The platform is available with free registration at the following link: https://europe-lac.b2match.io/

The call website provides a guide for applicants, national funding rules and the proposal form for download: https://www.eucelac-platform.eu/joint-actions

Proposals must be submitted in English through the online call management system: https://ptoutline.eu/app/5eulac_call2025

Reflections on Biodiversity and Climate Change: New Opportunities for EU-LAC Research Infrastructures

November 14, online

The Conversatory on Biodiversity, Climate Change and RI brought together more than 55 representatives of institutions from LAC, the EU and the Working Group. Its objective was to reflect on the opportunities and challenges in international cooperation and the issues of Biodiversity and Climate Change in both regions.

Sabina Guaylupo, Director of the Ibero-American Office of the Spanish Foundation for Science and Technology (FECYT) and coordinator of the ResInfra Plus project, and Alejandro Quinteros, Technician of the Uruguayan Agency for International Cooperation (AUCI) opened the event, presenting the EU LAC ResInfra Plus project and its 8 work packages.

Ana Mellado, Executive Project Coordinator at LifeWatch Eric, and Allan Campos Gallo, Director of the Environmental Management Area of the National High Technology Center (CeNAT), presented the topic of Biodiversity and Climate Change under a RI approach, addressing the relationship of the topic with their respective regions and identifying problems and development opportunities for their respective regions.

Finally, a group discussion ensued, in which the participants exchanged proposals to establish new strategic lines of work.

Innovation cooperation between Chile and Europe strengthened at the EU-LAC Innovation Cooperation Masterclass

November 6, Chile

The EU-LAC Innovation Cooperation Masterclass was held with the objective of strengthening collaboration between the innovation ecosystems of Chile and Europe. The event, organized by ENRICH in LAC and supported by the Global Service Facility (GSF), brought together 45 experts from Europe and Latin America, including representatives from academia, government and the private sector.

The event focused on Chilean innovation centers, enhancing their capacity to collaborate with European actors and thus strengthen ties with other regions. Throughout the sessions, participants explored key topics such as the internationalization of start-ups and how to adapt support services to the needs of stakeholders on both continents. The sessions highlighted successful examples of EU-LAC collaboration, such as the experiences of Imagine Lab and Start-Up Chile, and discussed internationalization strategies, business models and funding opportunities.

In addition, the need to adapt the services of innovation hubs to facilitate internationalization was addressed, with initiatives such as the Soft-Landing Certification by ENRICH. The importance of overcoming cultural barriers in business was also emphasized, promoting cultural intelligence as a key tool for effective collaboration. Finally, the event concluded with a renewed commitment to international cooperation, highlighting the fundamental role of EU-LAC partnerships in promoting innovation and economic growth.

Innovation without borders: Bogota hosts the first workshop on EU-LAC Research Cooperation to Boost Cooperation in Sustainability and Start-ups

August 26 and 27, Colombia

The first EU-LAC Innovation Cooperation workshop was held in Bogota on August 26-27, 2024. The event was attended by Colombian public officials, the EU Delegation in Colombia, local entrepreneurs and civil society representatives, as well as key actors of the innovation ecosystem in Colombia.

This meeting is a result of the meeting in November 2023, between the Directorate General for Research and Innovation and the Senior Officials Meeting at the Joint Meeting on Research and Innovation, where one of the results was the agreement to review the existing "EU-CELAC Roadmap for Research and Innovation".

In this context, the EU-LAC Innovation Cooperation Initiative was launched, which aims to foster collaboration between innovators from Europe, Latin America and the Caribbean to address common sustainable development challenges, as well as to consolidate the presence of European innovators in the LAC region.

As part of this initiative, a network of start-up incubators and accelerators from both continents was created, bringing together for the first time 10 incubators from the EU and 10 from Latin America and the Caribbean. This event marked the beginning of cooperation and knowledge sharing, with the aim of connecting entrepreneurs and innovators and creating partnerships that will be further evaluated in the coming months.

Solo de Ciencia 2024: From Artificial Intelligence to Living Soil, a Success for Science Communication

November 27 and 28, Peru

The Iberoamerican contest of scientific monologues, Solo de Ciencia, was held. The objective of the contest is to promote science communication in Spanish, stimulating those who develop their studies or professional career in the field of science and technology to become actively involved in science communication in scenarios that are usually far from this type of initiatives.

The final, organized by the National Council for Science, Technology and Innovation (Concytec) of Peru, with the collaboration of the Spanish Embassy in Peru and FECYT, brought together representatives from several countries besides the host Peru, such as Costa Rica, Ecuador, Spain, Paraguay and Uruguay, which addressed very different scientific topics. These themes refer to the use of microorganisms to recover contaminated ecosystems, radiation, the importance of soil as a living resource, healthy food, care or artificial intelligence.

Two representatives from the LAC region were present in the first and second places of the monologue. First place went to Ecuador's María Verónica Vivar Serrano, an agricultural engineer and dean of the Catholic University of Cuenca. Under the title “I am the soil... I am alive!”, María focused on spreading the importance of soil as a living and essential resource.

The second place went to Pablo Javier Fernández Mora, Uruguayan programmer and systems analyst, with his monologue “Chatting with AI and Digital Citizenship”, an entertaining exploration of the interaction between artificial intelligence and society.

Successful MSCA 2024 Call: More than 1,400 Proposals Submitted for Doctoral Networks in Europe

DOCTORAL NETWORKS CALL 2024 - SUBMISSIONS

JD	Venezuela	1	1	1

The European Union's Research Executive Agency (REA) has received a total of 1,417 proposals in the Marie Skłodowska-Curie Actions (MSCA) Doctoral Networks 2024 call. This process has been a great success and reflects the growing interest in strengthening research and innovation in Europe. Of the 1,417 proposals submitted, more than 190 projects will be selected.

The European Commission has published a detailed article on the statistics and next steps for applicants on the MSCA website. Interested parties can consult the complete information and submission figures at the following link: https://europa.eu/!QWVrqg

Booster: The New Horizon Results Program Update to Boost Research Project Dissemination and Exploitation

The European Commission has launched an update of the Horizon Results Booster program, now known as Booster, to further support beneficiaries of EU-funded research projects in their dissemination and exploitation process.

Until 2028 “Booster” will offer targeted advice, helping participants to further develop free of charge dissemination and exploitation strategies, business plans, risk assessments, and more.

Booster services are available to grantees with results at all levels of technological readiness, in any scientific or technological field. Depending on the type of results, the advice provided can help launch an innovation to market, disseminate relevant results to policy makers, or identify opportunities for further applied research.

Visit the Booster platform here: https://www.horizonresultsbooster.eu/

NCP4Missions

Factsheets: The Value of Social Engagement in EU Missions

NCP4Missions has published five fact sheets on the role of social engagement in EU Missions. The factsheets include information on the success of social engagement activities of ongoing projects, as well as a list of open funding opportunities and other ways to get involved in Missions.

Access the fact sheets with the following link: Click here.

Mission Soil Podcast: "Leading the transition to healthy soils: a closer look at EU Mission Soil"

The Mission Soil Platform has launched a podcast series dedicated to Mission Soil.

Access the first episode through the Mission Soil Platform: Access the podcast here.

Call the Algae Accelerator

The Algae Accelerator is a six-month mentoring program. This initiative aims to strengthen the capacity of startups and SMEs by connecting them with experienced mentors who provide specific guidance to refine business strategies and navigate industry challenges.

For more information visit the Algae Accelerator website: Click here.

Call BioProtect

BioProtect, a Mission Ocean-funded project is looking for 5 regions to implement and improve area-based management tools developed by the project and tested in demonstration sites. The initiative aims to improve biodiversity conservation tools, gather regional feedback and improve the adaptability of solutions.

For more information visit the BioProtect website: Click here.

Peru Strengthens its Participation in Horizon Europe with Training and Project Dissemination Workshops

November 25 and 28, Peru

The Horizon Europe training workshop was held in the city of Arequipa. It began at the Universidad Católica Santa María, with the participation of Viktoria Bodnarova, Euraxess Regional Coordinator for Latin America, who explained the tools to apply for the Program's cooperation funds. Likewise, the National Council for Science, Technology and Innovation (Concytec), as NCP of the Program, disseminated the opportunities to apply to become a Program manager in the research lines of greatest interest in Peru, such as food security, biodiversity, climate change, renewable energies, circular economy, among other topics. Likewise, the winning projects in which Peru has applied were presented, highlighting the RIs project where Concytec has a NCP for the European Union.

On the second day, Concytec replicated its experience with the research units of Universidad Católica San Pablo and Universidad La Salle. Euraxess LAC was accompanying Concytec in its dissemination activities.

On November 27 and 28, Concytec organized the event “Cooperation Opportunities in the European Union's Horizon Europe Program” to present the main characteristics of the Horizon Europe program, officially introducing the NCPs and promoting greater participation of Peruvian researcher projects. It was also presented about: Euraxess; Pillar 1 with focus on MSCA, presenting success cases of this pillar; Pillar 2, through collaborative projects; and the search for partners through the Funding & Tenders portal.

Dominican Republic relaunches its Network of National Contact Points with Workshop on Horizon Europe

November 27, hybrid

The Network of National Contact Points of the Dominican Republic was re-launched, as well as a workshop to update the key issues of the Horizon Europe program. This activity was organized by the Ministry of Higher Education, Science and Technology (MESCyT), the German Contact Point Center of the Horizon Europe Program for Digital and Industrial Technologies and the Federico Henriquez y Carvajal University (UFHEC).

Dr. Christof Hass, German NCP for Digital and Industrial Technologies (NCP DIT) at the Project Management Agency (Projektträger Jülich, PtJ) of the Jülich Research Center (Forschungszentrum Jülich), came from Germany for a special visit. He is leader of the work package for capacity building in the ongoing NCP network project NCP4Industry.

SAFE project offers 60 doctoral and postdoctoral fellowships for at-risk researchers

The EU-funded SAFE project "Supporting At-risk investigators with Fellowships in Europe" offers up to 60 fellowships for at-risk doctoral and postdoctoral researchers of any non-EU nationality to undertake a research stay at an EU higher education and research institution. The project offers an optional candidate search service until mid-December to help researchers and host institutions with no previous contacts to get in touch to submit a joint application.

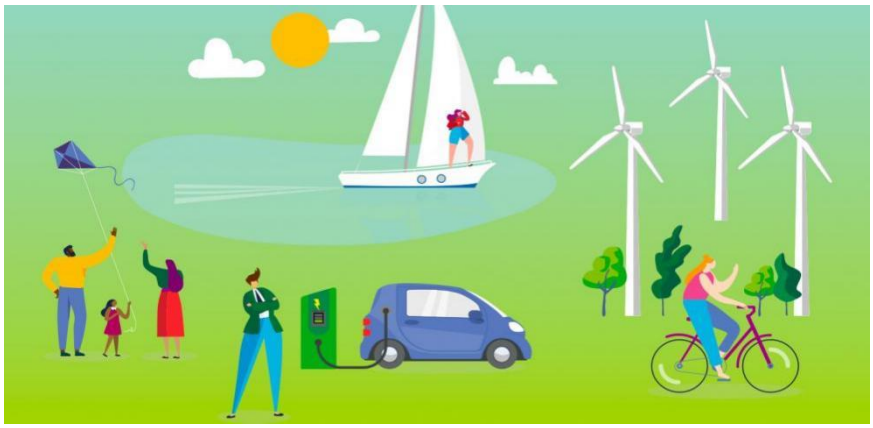

The call will remain open until January 20, 2025, at:

- 23:59 CET;
- 19:59 Uruguay / Argentina / Brazil / Chile;
- 18:59 Dominican Republic / Paraguay / Bolivia / Cuba;
- 17:59 Peru / Colombia / Ecuador / Panama;
- 16:59 Mexico / Costa Rica / El Salvador / Guatemala / Honduras / Nicaragua.

For more information, please visit the project website: https://saferesearchers.eu/application/ or contact the e-mail: info.safe@daad.de.

Calls

Cluster 5- Climate, energy and mobility

Open for submission:

1. *Development of smart concepts of integrated energy driven bio-refineries for co-production of advanced biofuels, bio-chemicals and biomaterials*

Opening: September 17, 2024 Deadline: February 04, 2025
Type of action: RIA Budget: € 7.000.000
https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/horizon-cl5-2024-d3-02-03

2. *DACCS and BECCS for CO2 removal/negative emissions*

Opening: September 17, 2024 Deadline: February 04, 2025
Type of action: RIA Budget: € 15 000 000
https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/HORIZON-CL5-2024-D3-02-12

3. *Support to the activities of the SET Plan Key Action area Renewable fuels and bioenergy*

Opening: September 17, 2024 Deadline: February 04, 2025
Type of action: CSA Budget: € 600 000
https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/HORIZON-CL5-2024-D3-02-13

Upcoming events

January 17 and 18: Call for Innovation Fund 2024 and Information Day on Batteries

Info day to present the key features and award criteria of the recently launched Innovation Fund 2024 Call (IF24 Call) and the Innovation Fund 2024 Battery call (IF24 Battery). Also present the lessons learned from previous calls to demonstrate best practices.

Registration: https://forms.office.com/e/UweaTgC5w9

January 20: SECRETed Webinar - Unlocking the Potential of Marine Biotechnology

This webinar brings together SECRETed partners to present their latest advances and innovative results in marine biotechnology and industry-driven production of amphiphilic molecules, with a focus on end-user applications.

More information: https://www.secreted.eu/secreted-webinar/

January 21: Online coaching session "Gender aspects in Horizon Europe"

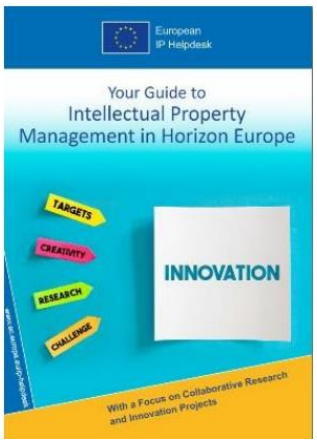

Integrating the gender dimension is a mandatory requirement in all Horizon Europe research and innovation projects. How to meet this criterion and how to better address the gender dimension will be the topic of this webinar.

Registration: https://forms.office.com/e/UweaTgC5w9

Your Guide to Intellectual property Management in Horizon Europe

The purpose of this guide is to spotlight critical aspects and novelties related to Intellectual Property (IP) management in the context of collaborative research and innovation projects funded under the European Union's current Framework Programme for Research and Innovation "Horizon Europe" (2021-2027). It does not claim to be exhaustive. The IP rules of Horizon Europe are built to a large extent on the regulations established by the previous Framework Programme "Horizon 2020". Therefore, this guide complements the existing guide "Your Guide to IP in Horizon 2020".
