Short description of your institution/company:

Alcazar is a research and analysis consultancy specializing in hydrogen and the energy transition. We are highly skilled in predictive analytics and business intelligence within the renewables arena. We appraise the commoditization of hydrogen across the entire value chain and its complex integration within the renewables generation framework; we analyse the impact of energy storage on smoothing imbalances between energy production and consumption; we explore the practical consequences of new green technologies in decreasing dependency on fossil fuels; we analyse the economic effects of the long-term shift in global and regional climate patterns; we scrutinize the cross-asset dependencies associated with energy distribution to optimize utilization; we study opportunities arising from the cross-over of electrification within the renewables energy framework.
